PROFESSIONAL SUMMARY

Computer Science student with hands-on experience building full-stack applications and machine learning systems. Developed end-to-end projects from design to deployment. Strong foundation in data structures, algorithms, and problem-solving.

SKILLS

Programming Languages: Java, Python, C, C++, JavaScript, HTML, CSS
Frontend Development: React, UI Development, Component-Based Architecture
Backend & APIs: FastAPI
Machine Learning & AI: NumPy, Pandas, Scikit-learn, Matplotlib, Supervised Learning, Unsupervised Learning, Classification Models, Regression Models, Model Training, Data Preprocessing, Feature Engineering
AI Tools & Concepts: LangChain, Prompt Engineering, LLM Applications
Databases: SQL (CRUD, Joins)
Tools: Google Colab, Jupyter Notebook
Core CS: DSA, OOP, DBMS, OS, CN
Soft Skills: Communication, Leadership, Analytical Thinking, Problem Solving, Team Collaboration

PROJECTS

Ashvaan - Mental Health Support Platform

- Designed system architecture for confidential psychological support platform with AI-chatbot, stress analysis, and anonymous discussion features
- Developed stress analysis logic using questionnaire and activity-based inputs to assess user well-being
- Built AI-assisted chatbot for emotional support and guidance integrated with REST APIs
- Implemented anonymous discussion space enabling users to share concerns without revealing identity
- Collaborated with cross-functional team to translate requirements into features and deploy to production

Spam Email Detection System

- Built machine learning pipeline for email classification using Logistic Regression
- Performed data preprocessing including text cleaning, feature extraction, and dataset preparation
- Trained and tested model on labeled email datasets to evaluate performance
- Developed using Python, NumPy, Pandas, and Scikit-learn

Movie Recommendation Engine

- Developed recommendation system using similarity-based filtering
- Processed structured datasets to extract patterns and relationships
- Implemented similarity algorithm to rank movies
- Improved recommendation relevance through testing and iteration
- Built using Python, Pandas, NumPy, Scikit-learn

EDUCATION

Bachelor of Technology (B.Tech) - Computer Science & Engineering *2023 – 2027*
Bhagwan Parshuram Institute of Technology (BPIT), Delhi — CGPA: 7.9/10
Diploma in Computer Engineering *2018 – 2021*
G.B. Pant Institute of Technology, Delhi — Percentage: 71.74%

CERTIFICATIONS & ACHIEVEMENTS

- Machine Learning Training Certificate
- Smart India Hackathon (SIH) 2025 Participant
